

Guardian Manual Appendum For Amlga 1200 Users

Controls

Although Guardian was originally designed to use a CD32 Joypad a mouse/keyboard control system has been added for users without access to such device

Once the game has loaded press the Return key to start.

Use the cursor and return keys to select form the menu.

Move mouse to steer

Use Left Mouse Button for thrust

Use Right Mouse Button for reverse thrust

Left Amlga key for fire

Left Alt key to flip 180 degrees (must be moving)

Space Bar to activate smart bomb

Tab key to fire guided missiles

Hit Escape to access in game menu and cursor keys to select functions. Use Ctrl/Shift to alter screen position while in menu system.

Hard Disk Installation

Running Guardian from the computer's harddisk is only possible for those with extra memory in their computers. To install simply drag the Guardian program disk into your games drawer. Intuition will create a Guardian drawer and copy all the files from the disk.

Simply click on the Guardian icon in the Guardian drawer that has been created to run the game.

It is possible to install Guardian data disk onto hard drive.
